

Infection Control Product Lines

CleanWhite®

- Patented & ultra-safe white light disinfection.
- Kills 99.9% of bacteria and other pathogens including SARS-CoV-2, staph (including MRSA), C. diff, listeria, and legionella.
- Conduct exams and surgical procedures under a continuously disinfecting light source that is 100% safe for humans.
- 405nm light has been proven to kill surface pathogens that are known to cause healthcare-associated infections, including surgical site infections.
- Chemical-free approach continuously destroys biofilms.

Air Guardian®

- Eliminate 99.9% of bacteria, virus (including SARS-CoV-2), mold spores, allergens, and other pathogens without a filter.
- Utilizes CDC-recommended UVGI and directional airflow.
- Emits clean air directly into the breathing zone after eliminating pathogens and particulates.
- No filter changes. Requires minimal ongoing maintenance. Installs identically to a light fixture.
- Portable model available for mobile usage.

Vertices AQS™

- Indoor/Outdoor Air Quality Monitoring Device with building systems controls.
- Fully functional cloud based web and mobile applications.
- Can store historical data for up to 5 years.
- LED indicators and app alerts notify users if air quality thresholds are exceeded.
- Integrates with Air Guardian and any IoT capable lighting solution.
