

The Portable™ by Air Guardian

For Construction & Renovation, Restoration, Mold Remediation, and Healthcare

The Portable continuously neutralizes pathogens, including mold spores, and purifies air whenever placed in a normal room setting. Provides mobile, complete air purification, disinfection, and destruction of pathogens and chemical agents by using CDC recommended UVGI combined with industry-leading levels of energy for oxidations. The Portable produces frequent room air changes and protective airflow in any space.

Applications

Suitable for most commercial and institutional applications.

IoT compatible. (Internet of Things)

- Construction and Restoration
- Mold Remediation and Abatement
- Final and Terminal Cleaning
- Remodeling and Renovation
- Overall dust, mold spore, and pathogen reduction

Features:

- Eliminates microscopic particulates including dust, mold spores, VOCs, and pathogens without a filter or chemicals.
- Emits no ozone (UL-2988 certified) or VOCs (volatile organic compounds). May help in relieving symptoms of allergies to dust, mold, spores, or other environmental irritants.
- Integrated, real-time monitoring of indoor air quality on a mobile and web application dashboard by Vertices AQS provides immediate and easy visualization of historical and present room air status.
- Low to no maintenance eliminates cost and health risks associated with replacing filters.
- For use with any standard American or European plug.
- Adjustable nozzle ensures upper air is being purified in any room, while providing continuous clean air to the breathing zone.

Technical Data:

Amps: 1.35 (±10%)
 Wattage: 164
 Airflow: up to 400 CFM
 Voltage: 120 ~ 277
 Weight: 39.96 lb
 Base: 36"
 Height: 7'4" - 10'
 Max Width: 21 1/4" x 24 1/4"

Warranty:

- UV-A & UV-C LED circuits: 30,000 hrs
- Drivers, Fans: 5 yrs
- Chamber Housing: Useful Lifetime

Rev. 10/22
