

The Portable™ By Air Guardian

Mobile UVGI Air Purification with Optional Air Quality Monitor

The Portable™ by Air Guardian is the answer to meeting CDC recommended UVGI air purification in a mobile unit, continuously neutralizing pathogens, including bacteria, viruses, mold spores, fungal spores, and particulate matter. The Portable produces frequent room air changes and protective directional air flow.

Applications

Suitable for most commercial and institutional applications.

- Hospitals & Medical Office Buildings
- Construction and Restoration
- Hospitality and Commercial Shared Spaces
- Mold Remediation and Abatement
- Overall Dust, Mold Spore, and Pathogen Reduction

Features & Benefits

- UVGI air purification eliminates microscopic particulates including dust, mold spores, VOCs, and pathogens without a filter or chemicals.
- Emits no ozone (UL-2998 certified) or VOCs.
- Optional Indoor Air Quality Monitoring through Vertices AQS
- Quick and easy installation.
- Low to no maintenance eliminates cost and health risks associated with replacing filters.
- American and European power options available.
- Adjustable nozzle to ensure upper air draw in any ceiling height.

Technical Data

Amps	1.35 (10% variance)
Wattage	164
Airflow	400 CFM
Voltage	120 ~277
Base Height	36"
Maximum Height	9'
Width	21 1/4" x 24 1/4"
Cord Length	4'

Warranty

- UV-A & UV-C LED circuits: 30,000 hours
- Drivers & Fans: 5 years Chamber
- Housing: Useful Lifetime
