illumPure

Light that does *more* than illuminate.

High-Color Rendering Index, flicker-free, antimicrobial lighting engineered to support student focus, comfort, and health from the fixtures you already have.

Challenges in Education

- **Chronic Absenteeism:** Absences directly impact performance metrics, funding, and staffing.
- **Cognitive Strain:** Poor lighting causes eye strain and reduced attention, especially for students with autism, ADHD, and sensory disorders.
- **Cleaning Gaps:** Standard protocols only address surfaces periodically, leaving gaps for pathogens to spread between cleanings.
- **Staff Health Concerns:** Educator sick days strain substitute budgets and disrupt classroom continuity.

Applications

- Classrooms
- Nurse's Offices
- Gymnasiums
- Weight Rooms
- Teachers/Staff Breakrooms
- Special Education Classrooms
- Sensory Support Spaces
- STEM Classrooms
- Offices

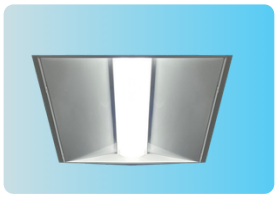
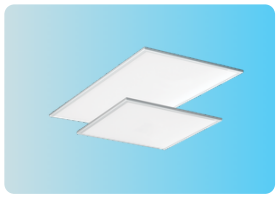
STUDENTS MISS OVER 10% OF SCHOOL DAYS

Why CleanWhite®

Continuous Protection: Continuously provides antimicrobial protection for air and surfaces to help maintain a cleaner classroom environment.
Enhances Focus: Eliminates harsh blue light spikes and flicker for a calm, productive environment.
Low-Blue, Sensory-Friendly Light: Reduced blue light content and flicker-free output create a calmer visual environment, supporting students with autism and sensory processing needs. Independently verified as Risk Group 0 (IEC 62471), the safest classification available.





Standards & Certifications

Created for the demands of modern education spaces

- **Educational Excellence:** Supports ANSI/IES RP-3-20 lighting recommendations for educational facilities.
- **Top-Tier Safety:** IEC 62471 Risk Group 0, the safest classification available.
- **Certification Ready:** Supports LEED, WELL, and CHPS goals.
- **IAQ Compliance:** Supports CDC Indoor Air Quality and disinfection guidelines.

A Healthier Building for Students and Staff

Absences cost districts twice: teacher coverage adds roughly $1,800 per absence on top of salary, while a sick student costs about $65 in lost attendance funding. Meanwhile the building, staff, and buses run at full cost regardless. CleanWhite works on the environment they all share, through your existing lighting infrastructure, with no major renovation and pricing that fits operational budgets.
